External playlist example

How to

If you want to use an external playlist you have to add the `external_playlist` parameter to your embed URL and its value has to be content ids separated by commas.

Optional

From player configuration, at "Relation" tab you can configure an autoplay behavior checking the "**Autoplay Relation**" checkbox and also you can specify the delay.

Custom styles

You can configure your player in the "Look and feel" section and add custom styles like the following example:

```
@media (max-width: 720px) {  
  .vid-list-container {  
    visibility: hidden;  
  }  
  #media-player-container-with-playlist {  
    width: 100%;  
  }  
}
```
