Update content information by content_id

This method update the content information via API

Method: **PUT**

URL: **/api/v3/content/contentId/:id**

Complete Example Params Request: (JSON)

```
{
  "access_token" :

```

```
"8191afae55187f8b1931641bcffbf95910f695836762ead1d5008b6113e7848420171213261133",
"description" : "Test API by JSON",
  "name" : "Prueba",
  "status" : "enabled",
  "tags" : [
    {
      "name": "test1"
    },
    {
      "name": "test2"
    }
  ],
  "comscore" : [
    {
      "key": "ns_st_st",
      "value": "TEST API 2"
    }
  ],
  "geoblock": "IT",
  "sharing_url": "test123"}
```

Response example:

```
{
  "content": {
    "comscore": [
      {
        "key": "ns_st_st",
        "value": "TEST API 2"
      }
    ],
    "description": "Test API by JSON",
    "geoblock": "IT",
    "name": "Prueba",
    "sharing_url": "test123",
```

```
"status": "enabled",
"tags": [
  {
    "name": "test1"
  },
  {
    "name": "test2"
  }
],
"message": "Updated info."}
```

Update content thumbnail

This method update the thumbnail of the content via API

Method: **POST**

URL: **/api/v3/content/thumb/contentId/:id**

Required Params:

access_token (form-data file)
file (form-data file)

Response example:

```
{
  "ContentType": "image/jpeg",
  "Filename": "1-44-1-MH82KY1516200439-1561990605.jpg",
```

```
"RealFormat": "jpeg",  
"Resolution": "5120x2880",  
"Size": 16591111,  
"Status": "Successfully uploaded"}
```

Search Contents By Pid

This method will search items in content by tag, name, description. You can get more items moving the from value. default limit is 50 maximum 100 items per request

Method: **GET**

URL: **/api/v3/content/search**

Required Params:

```
access_token (string required)  
pid (int required)  
query (string required)  
from (int optional)  
limit (int optional maximum 100, default 50)
```

Response example:

```
[  
  {  
    "name": "Video: le robaron 20 mil dólares a una jubilada en San Telmo",  
    "description": "<p> El testimonio de Carolina, la hija de la víctima.</p>\n",  
    "content_id": 787789,
```

```
    "status": "disabled",

    "external_id": "18-13890-2f3jCQ1574365043423",
    "plays": 19,
    "impressions": 24
  }
}]
```

Get Most Played Contents By Pid

This method fetch most played items in content by publisher id. You can get more items moving the from value. default limit is 50 maximum 100 items per request

Method: **GET**

URL: **/api/v3/content/most_played**

Required Params:

access_token (string required)
pid (int required)
from (int optional)
limit (int optional maximum 100, default 50)

Response example:

```
[
  {
    "name": "gran robot",
    "description": "Change the description",
    "content_id": 660,
    "status": "enabled",
    "gid": 7,
    "group_name": "vodgc",
    "publisher_id": 18,
    "publisher_name": "vodgc",
    "created_at": "2017-08-03T17:26:20Z",
    "created_by": "jonathan brenman",
    "content_type": "video",
    "external_id": "18-40-1-25T76Q1501791967",
    "plays": 500,
    "impressions": 550
  },
  {
    "name": "0123456789AABBCCDDEEFFGG_Small",
    "description": "Change the description",
    "content_id": 629651,
    "status": "enabled",
    "gid": 7,
    "group_name": "vodgc",
    "publisher_id": 18,
    "publisher_name": "vodgc",
