Genoa-player V3

GENOA PLAYER V3

Whats new?

Genoa player v3 use a library which you call onetime when you loading your player/s page and will render on the genoa-player tags. Use your player in your native page without iframe and call the library once for multiple players.

Library link: <https://player.vodgc.net/dist/V3/genoa-player.min.js>

Library link for tests: <https://testplayer.vodgc.net/dist/V3/genoa-player.min.js>

* Genoa pass_data is deprecated now is genoa_pass_data and it is be located in your page see in example.

How its works?

The library fetch all the html5 tags called genoa-player and render the player inside them.

You can access to the player in your page because there is no iframe anymore!
